

**Rain Flow Gutter Protection
10 YEAR LIMITED WARRANTY**

Subject to the terms, exclusions and other limitations of this Limited Warranty set forth herein, Rain Flow USA, Inc. hereby warrants, exclusively to the original registered homeowner/building owner of the structure on which the Rain Flow Total Gutter Protection (hereinafter called Rain Flow) product is originally installed, that its Rain Flow product is free from defects in material and workmanship when it was shipped from the factory. Rain Flow, when properly installed for normal use, and with minimal regular maintenance, is designed to keep the interior of the gutters free-flowing for a period of 10 years from date of installation.

For a period of 10 years from date of installation, should material or workmanship defects present when the Rain Flow product was shipped from the factory result in a failure to keep gutters free flowing due to the interior of the gutters becoming clogged despite regular maintenance by the homeowner/building owner, Rain Flow USA, Inc. will replace the defective Rain Flow product as set forth below.

For this Limited Warranty to apply, all of the following conditions must be met:

- Rain Flow must be purchased directly from Rain Flow USA, Inc., or from an authorized re-seller of Rain Flow;
- All gutters must be thoroughly cleaned and all connected downspouts and any connected underground drains must be clear and free of debris and/or obstructions prior to installation of Rain Flow;
- Rain Flow must be installed according to Rain Flow's installation provisions and instructions;
- The original homeowner/building owner of the structure on which the Rain Flow is originally installed must register by completing and signing the Limited Warranty Registration Form below and returning it to Rain Flow USA, Inc. within 30 days following the installation of Rain Flow;
- Gutters on which the Rain Flow is installed must be properly sloped and in compliance with all applicable state and local building codes.
- Because conditions vary on every Rain Flow application, the original registered homeowner/building owner must provide regular maintenance and debris removal as needed from any areas where Rain Flow is installed that may, because of roof design and/or conditions (including but not limited to roof valleys, gutter splash guards, etc.) collect debris.
